The G20 Protesters? ☺

The G20 Protesters? ☺

They say you can't tell people what to do. But, when people tell us the best way to get the policies we want is to yell at what looks like half a concentration camp built through the heart of downtown Toronto... we shouldn't just take this crap. So, it might be time to expose their \$1 billion monument to wasteful stupidity.

Why is this "circus" what most "mainstream activists" funded by wealthy "tax-exempt foundations" want to do? Will they learn the same wealthy families they're up against (Rockefeller, Ford, etc.) only created private charitable "foundations" to give out "grants" to control most "activism" and "academia" and fool good people?

Will they look into the U.S. Congress 1954 Reece Commission hearings? Or Google "Norman Dodd" to hear someone involved explain it? Will they see the "Yell and go home!" model as deliberately pointless? Will they see this approach has lead to the G20 countries now running the world? Will they if they care?

Why don't they realize most of the people they're trying to help don't care about or respond to this approach at all? That most politicians don't either? That almost nobody does? That it just helps the government and media demonize "dissent" by making activists look violent and stupid? Every time? This time? Again?

Will they look into how to share info to help our neighbours make smarter choices that help us make big changes? Will they try to "explain" themselves to people instead of just yelling at cops just doing their jobs trying to keep straight faces? Can they see that the government built them a big "Hollywood set" for this insanity?

Can we all see that this whole staged "protest" is just a big joke?

Can we all see it would be better if people decided NOT to go?

Why are the latest "war on terror" toys for "terrorists" being used against Canadian citizens like it's "normal" to? Why are 10,000 cops, troops, spooks and 1000 "private contractors" or "killers" being deployed in downtown Toronto? Could this even happen in Canada without carefully staging "protests"? Is this why they do?

Will people see why we shouldn't call it a "police state" when it's really the "corporate-bankster state" behind this circus? Are they telling us not to have "general strikes" or peacefully walk through our streets like millions of ordinary Greeks, French, Spanish and others are against the "global recession" strangling Canada too?

Why couldn't they have their little "face off" at a "FEMA camp" style set-up in remote location so that only the people who go would be affected? Like in Montebello in '07 when muscle-bound cops were caught posing as skinny anarchists with masks and rocks and dove behind a police line for protection on television?

Will the government do this, or stage "false flag" attacks, or "blow something up" to justify the "\$1 billion" in "security"? Like the bank in Ottawa? Will more people 9 years later look into why "9/11 was an inside job!" so governments can't do this to scare us into accepting more wars, security and control? Is it time? ☺
